# 2022 AMS Compensation Study Southern Baptist Conference of Associational Leaders 

## Overview:

In 2017, SBCAL conducted a compensation study for associational leaders. For the past five years, the information from the study has been a tremendous resource for AMS search teams, associational Personnel Committees, and Finance Committees as they seek to properly compensate and provide benefits to their associational leaders.

However, things have changed greatly during the past five years, including AMS salaries, benefits, and budgets. That's why SBCAL has sponsored another AMS Compensation Study. The information that follows includes the results of the new study, conducted in February-March 2022.

There were 232 total associational leaders who participated in the study, which accounts for approximately one-fourth of all associational leaders. The number of associational leaders who participated in the study also increased by $33 \%$ when compared to the 2017 study. The margin of error for the study was $+/-6 \%$.

The results are broken down into three sections. Section 1 includes General Demographics of all participants. The associational leader's work status, current age, education, size of association, budget, and more are included in this section.

Section 2 includes the actual compensation statistics, including (1)Annual Gross Salary, (2)Benefits Provided by the Association, and (3)Total Compensation Package (Gross Salary + Benefits).

For comparison purposes, these statistics are categorized by three variables:

- Associational leader's work status (Full-time vs. Part-time)
- Number of churches in the association
- Annual associational budget

Please note that each of the compensation comparisons include three values: average, $25^{\text {th }}$ percentile, and $75^{\text {th }}$ percentile. The percentiles provide a suggested range.

Finally, Section 3 provides other financial information that may be helpful for associations as they plan for the future.

## Section 1: General Demographics

Table 1.1
Associational Leader's Work Status

| Work Status | \% of Responses | \# of Responses |
| :---: | :---: | :---: |
| Full-time | $78.9 \%$ | 183 |
| Bi-vocational/Part-time | $16.4 \%$ | 38 |
| Semi-retired | $2.2 \%$ | 5 |
| Unpaid | $2.6 \%$ | 6 |

Note: The percentage of full-time associational leaders in 2017 was $82.9 \%$ and is $78.9 \%$ in 2022.

## Note to Search Teams \& Finance Teams:

Tables 2.3-2.11 break down the compensation statistics by three variables: (1) associational leader's work status, (2) number of churches in the association, and (3) annual associational budget. To develop the most accurate comparisons for your association's context, it is recommended that you use all three variables in your calculations.

For example, if your association employs a full-time AMS, includes 60 churches, and your annual budget is $\$ 160,000$ per year, you would use the tables to locate the following statistics:

| Compensation Statistic | Full-Time AMS | 60 <br> Churches | $\$ 160 \mathrm{~K}$ <br> Budget | Comparison <br> (Average of all <br> 3 Values) |
| :---: | :---: | :---: | :---: | :---: |
| Salary: Average | $\$ 66,493$ | $\$ 62,158$ | $\$ 52,597$ | $\mathbf{\$ 6 0 , 4 1 6}$ |
| Salary: $25^{\text {th }}$ Percentile | $\$ 50,000$ | $\$ 48,917$ | $\$ 43,183$ | $\$ 47,367$ |
| Salary: $75^{\text {th }}$ Percentile | $\$ 76,750$ | $\$ 72,513$ | $\$ 61,658$ | $\$ 70,307$ |
| Total Package: Average | $\$ 84,922$ | $\$ 79,413$ | $\$ 63,887$ | $\$ 76,074$ |
| Total Package: $25^{\text {th }}$ Percentile | $\$ 64,449$ | $\$ 64,775$ | $\$ 55,715$ | $\$ 61,646$ |
| Total Package: $75^{\text {th }}$ Percentile | $\$ 99,576$ | $\$ 97,768$ | $\$ 79,507$ | $\$ 92,283$ |

When factoring in all three variables in this example, a comparable average salary for this associational leader is $\$ 60,416$. The salaries of most associational leaders in a similar context range from $\$ 47,367-\$ 70,307$.

A comparable average total compensation package for this associational leader would be $\$ 76,074$. The total compensation package of most associational leaders in a similar context range from \$61,646-\$92,283.

Additionally, Tables 2.12-2.14 break down the compensation statistics by educational level of the associational leader. While this variable is outside of the control of the association, it can be helpful information for AMS Search Committees to know.

Note: The percentages do not match those found in Table 3.5 because the grouping variable is not the same. Table 3.5 breaks down the percentages by the Annual Budget categories. Table 3.9 breaks down the percentages by the \# of Churches categories. The sample sizes of these categories are not the same, resulting in different percentages. (Each column in both tables adds up to $100 \%$.)
